Agreements & MOUs

FMF witnessed more than 75 joint ventures and agreements during the event. The signing ceremonies also included the handing over of exploration licenses to companies that won bids.

Every year, a busy schedule of daily MOUs takes place between a number of government agencies, companies, and institutions participating in the conference. These ceremonies are attended by international media, country ministers, and global specialist organizations.

These joint ventures cover a wide variety of activities and domains, ranging from mineral exploration, technology, and communications to the application of sustainability standards, localization, rehabilitation, and industrialization in the minerals sector.

Delegate Connect Program

With the improved Delegate Connect networking service, attendees will find interesting and relevant contacts to connect with before and during the event.

A self-learning matchmaking technology is deployed to identify industry preferences and make suggestions to participants in their search for the best business match.

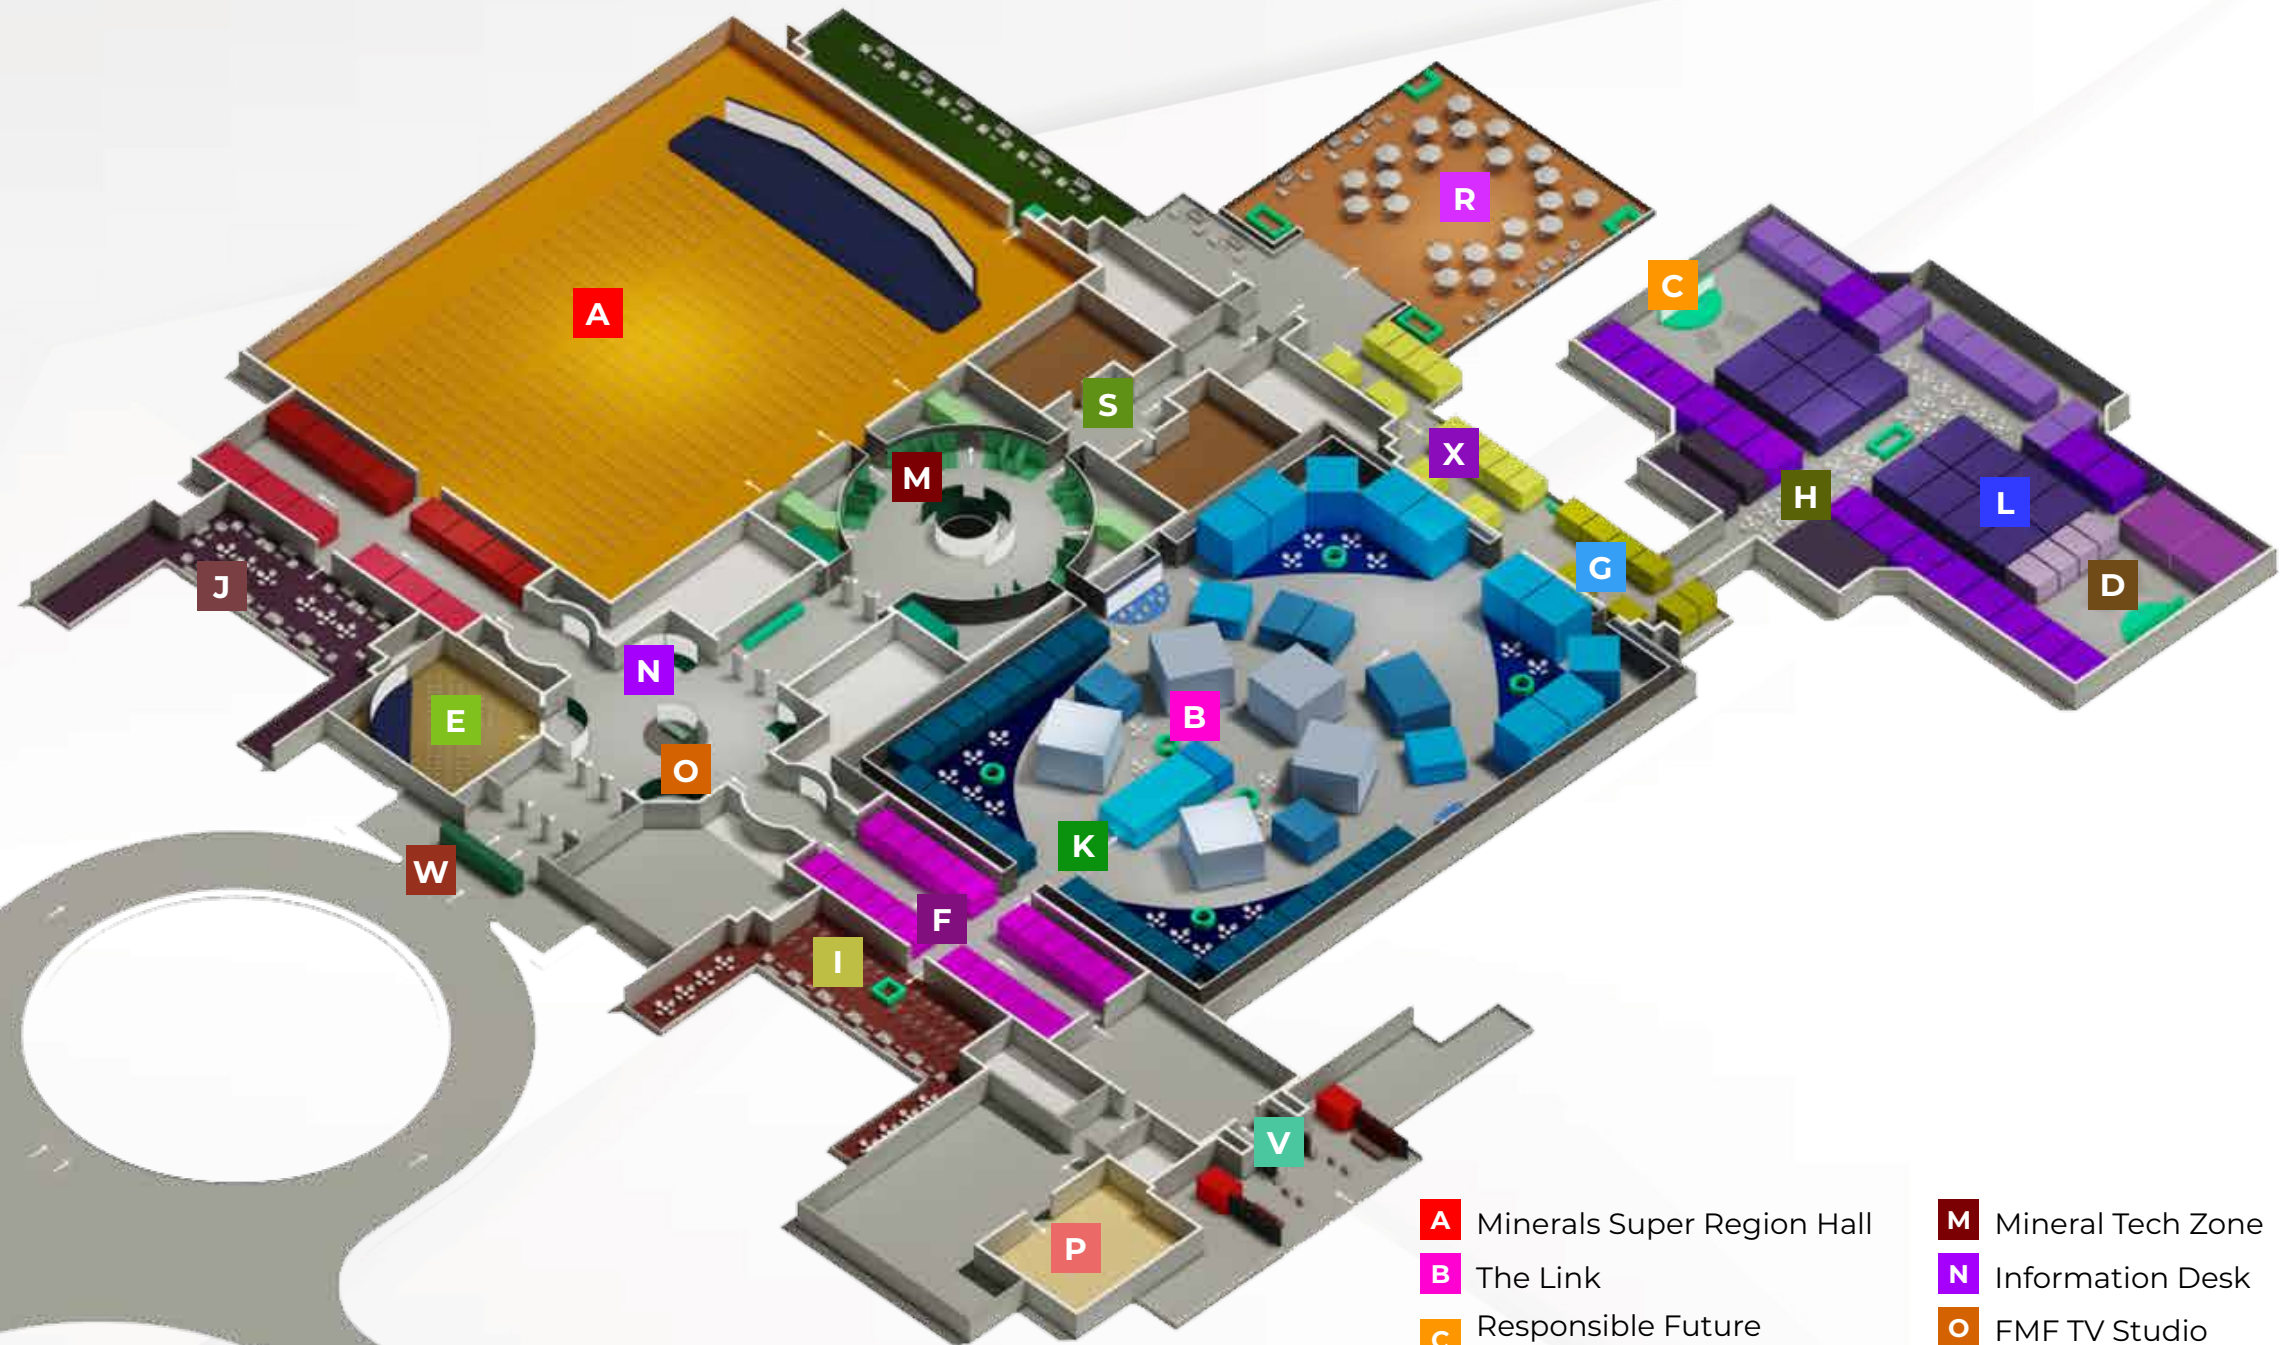

The Delegate Connect Program allows participants to research registered visitors and exhibitor representatives, contact interesting matches via the chat function and arrange appointments - both in-person and online.

Registered attendees for the event are able to schedule meetings before the event using the Delegate Connect online platform. Once registered, participants are automatically given access to the business matchmaking platform to view all participants and request meetings.

The Delegate Connect platform is a digital enabled and concierge service dedicated to creating networking opportunities between event attendees.
